**UNDERCUT THE
MARKET**

With simplicity comes affordability. With an MSRP of \$9.99, the device can be in every pocket, vehicle, job site and desk drawer.

**Targeted Delivery;
Innovative Drainage**

Designed to mimic the effectiveness of tap-mounted devices in a compact size, the PURIpurge™ delivers water to the center of the eye flushing outwards into the eye cup and out the drainage holes to prevent reintroducing the contaminant.

PURIpurge™

- **PORTABLE:**
Fitting easily in the palm of a hand the device can be taken anywhere
- **UNIVERSAL**
Fitting most disposable beverage bottles such as those made by Nestlé, Pepsi Co., and Coca Cola
- **REUSABLE**
Simply wash the device with soap and warm water per the included directions
- **I-WASH**
Flush an eye with the squeeze of a bottle, all the contaminants will flow away through the drainage holes

Created by emergency responder brothers, the PURIpurge™ was built with minimalism in mind. With a contaminant in your eye, simplicity is of utmost importance. This is where our sophisticated product R&D testing process came in to play.

"I will not be satisfied with the design until I can use it with my eyes closed, running at full speed"

All jokes aside, the PURIpurge™ can flush contaminants from the eye and surrounding area in seconds, flowing away through the patent-pending drainage holes.

**According to the
Occupational Health &
Safety
Administration:**

“Where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use.”

In that Spirit...

Any means of flushing the eye of contaminants is a fantastic addition to your workplace safety protocol.
